

TOTAL CUSTOMER EXPERIENCE

Enterprise infrastructure, delivered by engineers you can put in front of your customer.

TCE Technologies is a Philippine team of senior field engineers, presales consultants and certified project managers. Technology partners subcontract us to deliver under their brand. Enterprises engage us directly. We cover the cabling and the racks as well as the platform on top — and can supply the kit alongside the work.

30+

Years of combined field experience

20+

Certified engineers, presales & PMs

100+

Infrastructure projects delivered

4hrs

Target response, contracted support

HOW WE ENGAGE

One team. Two ways to work with us.

FOR TECHNOLOGY PARTNERS

Delivery capacity you can subcontract

For OEMs, distributors, integrators and MSPs who have won the deal but need certified hands.

- White-label field delivery — we arrive as your team
- Presales: sizing, solution design, BOM validation
- Cabling, racks and data center works at scale
- Resource augmentation and certified project management
- NDA and non-solicitation — your customer stays yours

FOR END CUSTOMERS

Senior attention on your own infrastructure

For IT leaders who want the people who did the work in the room, not a rotating bench.

- Storage, backup and disaster recovery design and build
- Virtualization and infrastructure consolidation
- Cabling, racks and data center build or migration
- Support for platforms the vendor no longer covers
- Hardware and license supply, so one party is accountable

SERVICES

Storage, Backup & Recovery

Data protection built around real recovery objectives — then restore-tested before sign-off.

Virtualization

Consolidation that genuinely cuts cost and risk, on a platform your team can operate.

Data Center Build & Migration

Rack and stack, power and containment, equipment relocation and decommissioning.

Structured Cabling & Networks

Copper and fibre installed to standard, certified, labelled and documented.

Support Services

Out-of-warranty cover that keeps proven hardware safely in production.

Consulting & Project Management

Presales rigour and PMP-led governance from the people who do the work.

ENGAGEMENT MODELS

- Resource augmentation** — a named engineer, architect or PM on your bench. Billed by engineer-day or month.
- Project-based delivery** — defined scope, milestones and acceptance criteria. Fixed price against an agreed SOW.
- Support contract** — ongoing cover for production infrastructure, including end-of-support platforms. Annual or multi-year.
- White-label delivery** — we deliver as an extension of your organization, under partner agreement.
- Solution supply** — we source and supply the hardware, software and licensing alongside the work.

PLATFORMS AND FRAMEWORKS WE DELIVER ON

DELL Technologies

Hewlett Packard Enterprise

Tell us what you need delivered.

A subcontract you need covered, an infrastructure project you are scoping, or an engineer needed on site next week. A senior member of the team replies personally, usually within one business day.

9/F Filinvest One Building, Northgate Cyberzone, Northgate Avenue, Alabang-Zapote Road, Muntinlupa City 1781, Philippines
